Acquisition Autodesk acquired Corel (and CorelDraw) from Corel Limited in 2002. CorelDraw was licensed to Autodesk in April 2002. Compatibility with other software

In many cases, AutoCAD files can be opened in other applications if the file format is known. Some examples of compatible applications are Adobe Illustrator (AI), Adobe Photoshop (PS), Indesign, QuarkXPress, Pagemaker, Mutatus, AutoCAD 360, and Excel. However, the exact file format is not always compatible with other applications, and the file may be fixed in the program when opened. AutoCAD's file format, is also backwards compatible with earlier versions of AutoCAD, but such compatibility is not guaranteed. REST-based API's AutoCAD Crack Keygen supports the use of REST-based APIs. These enable web, mobile and desktop applications to access AutoCAD functionality and interact with AutoCAD, providing a simpler way to build applications that interact with the drawing server for information. The AutoCAD REST-based API is a protocol-based specification, which enables the exchange of business information within an enterprise, for instance between the application and AutoCAD. software1. Field of the Invention The present invention relates to a head gimbal assembly for a hard disk drive. More specifically, the present invention relates to a head gimbal assembly for a hard disk drive in which a dimple positioned on the gimbal structure is used as an anti-stiction contact surface to reduce the stiction of the head slider on the gimbal.

2. Description of the Related Art Hard disk drives (HDD) are widely used in electronic devices, such as desktop computers, portable computers, mobile phones, and digital cameras, as a data storage medium. In a HDD, as a magnetic disk rotates, a read/write head reads data from and writes data to the magnetic disk. To maintain the read/write head in a desired position, a head gimbal assembly (HGA) is attached to the magnetic head to allow the head slider to follow any rotation of the magnetic disk. FIG. 1 is a plan view showing a conventional HGA. Referring to FIG. 1, the HGA includes a gimbal 12, a load beam 11 and a head slider 10. The gimbal 12 is attached to the load beam 11. The head slider 10 is attached to the gimbal 12. A head (not shown) is disposed on the slider 10. A dimple (not shown) for generating a floating force is formed on the load beam 11. When the load beam 11 is pressed down, the head slider 10 is pressed against the magnetic disk, so that data can be written and read. When the load beam 11 is released, the floating force generated by the dimple is used to hold the head slider 10 against the magnetic disk, so that the head slider 10 can perform a rotational ca3bfb1094

United Nations Human Rights Council

The United Nations Human Rights Council is the principal body of the United Nations, established in 2006 as a replacement for the "rarely convened, deeply flawed and non-accountable" United Nations Commission on Human Rights. The United Nations General Assembly, during its fifth special session, adopted on 26 March 2006 a resolution (A/RES/60/1) which established the new United Nations Human Rights Council as the successor to the United Nations Commission on Human Rights. The General Assembly also requested the Secretary-General to prepare proposals on the composition and procedures of the Council. The United Nations General Assembly, by its resolution 54/109 of 9 December 2006, endorsed the outcome of the first session of the Council on 27 February 2007, and decided that the Council would meet for the first time on 10 January 2007 at the United Nations Headquarters in New York City.

History

The United Nations Human Rights Council was established by the United Nations General Assembly as a successor to the United Nations Commission on Human Rights (UN-CHR). It replaced the 47-year-old UN-CHR in 2006 following the 2007 World Conference against Racism. Its stated purpose is to "prevent and eliminate discrimination based on race, color, sex, language,

religion, national or social origin, economic or social condition, birth or other status, and to promote respect for human rights". In 2007, the government of Sri Lanka requested for a meeting to discuss the situation of the Tamil population in the country. The Tamil groups rejected the government's justification for the meeting and instead organized protests, leading to the government's decision to pull out of the HRC. In 2007, the HRC elected as its chair Peru, and Argentina as its vice chair. The following year, during the first session of the council, the Council members, on 17 March 2007, voted to grant a status of "non-governmental organization" to the International Court of Justice. The 47-year-old
