The comprehensive amendment restricting the availability of insurance benefits in the Plan has spawned in great part from the plaintiffs' assertion that the Plan had adopted an affirmative misconduct rule designed to prevent employees and their dependents from accumulating disability benefits to which they were not entitled. The problem with this assertion is that the record is virtually devoid of any evidence supporting it. The record is similarly devoid of any evidence that the Plan adopted an affirmative misconduct rule designed to prevent its employees and their dependents from seeking disability benefits to which they were not entitled. In this Court's view, this matter should not be resolved by way of an attempt to either pigeonhole or pigeonhole away the plaintiffs' allegations. While the central issue in this case is the interplay of ERISA and the McCarran-Ferguson Act, these two provisions must be taken together and not in isolation. If the Court does not take that approach in resolving this dispute, the Court risks becoming the drafter of an ERISA plan amendment which should not have been adopted. This Court has carefully considered and is satisfied that the Plan

CuberStackX is a stopwatch used to measure how fast you solve your 3x3x3 Rubik's Cube. But, it can also be used for another purposes, depends on what's in your mind. Furthermore, CuberStackX comes with several nice built-in functions such as the log feature or the reset one. CuberStackX relies on shortcuts, as in its main interface doesn't have any buttons nor menus. So, here are the useful shortcuts to navigate around its functionality: · Space: Start/Stop the timer · Escape: Reset the timer · F1: Show Setup/Result/About window · F2: Show/Hide hour in main interface CuberStackX Requirements: · Microsoft Windows 2000 · Windows XP · Windows 7/Windows Server 2003 · Windows Server 2008 We've only checked the key features of CuberStackX, but there are lots of interesting things, what CuberStackX can do. CuberStackX can be used for real-time, there are 2 log feature shown in the screenshot (see the big.png); There's also the time stats, for example, the calculation(time) column, and the achievement(...) one. CuberStackX can be used for benchmarking, there are 3 columns in the screenshot (see the screenshot again). There are auto-solving, manual (but still not real-time) and the random-solving column. Furthermore, there's also the solution index that show the percentage of solved cube. The Solution index can be viewed by seeing it in the GUI. If you set the starting point in the GUI, it will start from there and you can see that the index always reach 100% only when the cube is solved. If you're interested about more features, check out this page. (The following paragraph is included for link only) This app was made for my parent's. They enjoy using 3x3x3 cubes for hours and hours. However, they requested to measure the time they spend. So, here I created this application, they can do it without buying any special software. However, if you want to measure how fast your 3x3x3 cube is solved, then I recommend you to give CuberStackX a try. Furthermore, there are some tips regarding this application, for example, make sure that you don't set the Time format. C

### What's New in the?
