**Stellar Phoenix Repair For SQL Anywhere Crack+ With Registration Code Free**

Stellar Phoenix Repair for SQL Anywhere is a powerful application that can help you recover data from damaged SQL Anywhere databases. It is capable of repairing tables, indexes, views, keys, triggers and constants, and its user-friendly interface makes it suitable for novices and experts alike. Handy utility that can help you find database files Stellar Phoenix Repair for SQL Anywhere can scan your partitions and locate all DB files automatically. The items are displayed in a simple list, and the program also provides you with their path, size and last modification date. While experienced users might not need this tool, others may not be entirely sure where the damaged database files are located, and searching for them manually is a time-consuming task. Import damaged SQL Anywhere databases and browse their contents Once you have located the files, you can load them into the application and use the built-in navigator to analyze tables, views, indexes and triggers. They are all displayed in a simple tree-like structure, and their contents are shown in the right-hand panel. Stellar Phoenix Repair for SQL Anywhere also provides you with a basic search function that can be used to find specific items. Restore corrupted databases and export the recovered data to various formats When the application has finished repairing your database, you can save the recovered information to a new DB file, but the program also allows you to export the data to CSV, Excel or HTML files. Moreover, it is possible to save the entire processing log, should you wish to analyze it at a later date. All in all, Stellar Phoenix Repair for SQL Anywhere is an application that could prove to be invaluable in the right scenario. It can help you repair corrupted SQL Anywhere databases, recovering damaged tables, views, indexes, triggers and keys.
